

MEMORANDUM FOR: Colonel White

1 December 1953

1. Immediately below is a suggested rewrite of paragraph 3.a. (2) which is entirely consistent with the law but simply makes the statement positive instead of negative. Also it deletes determination by the DCI of the necessity. As far as the Headquarters Regulation is concerned, this would seem appropriate since there has been a decision that all assigned cars will be withdrawn.

3.a.(2) "Official purposes" may include transportation from home to office only (a) for medical officers on out-patient duty, and (b) for other officers and employees where they are engaged in work which makes such transportation necessary.

2. If you agree with this wording, we will have the entire Regulation reworked to reflect the transfer of responsibility from the General Services Office to the Logistics Office.
